Site Updates

Before and after pictures of a man on Rogaine and Propecia We've just added a new set of before and after photos for a guy named Greg, who is using the only two clinically proven and FDA approved treatments for hair loss - Propecia and Rogaine. He's having great results, don't miss this!

You can see Greg's before and after photos here:

<http://www.hairlosstalk.com/profiles>

Greg's goal was to do some serious hair regrowth, so instead of just using Propecia and Nizoral which is typically sufficient for younger men wishing to maintain their hair... he went the Propecia/Rogaine route. Check out his results, you'll be very impressed! And yes, they're real, and yes you can email him yourself :)
