

# Regenera Activa

A SIMPLE AND EFFICIENT WAY TO REGENERATE HAIR

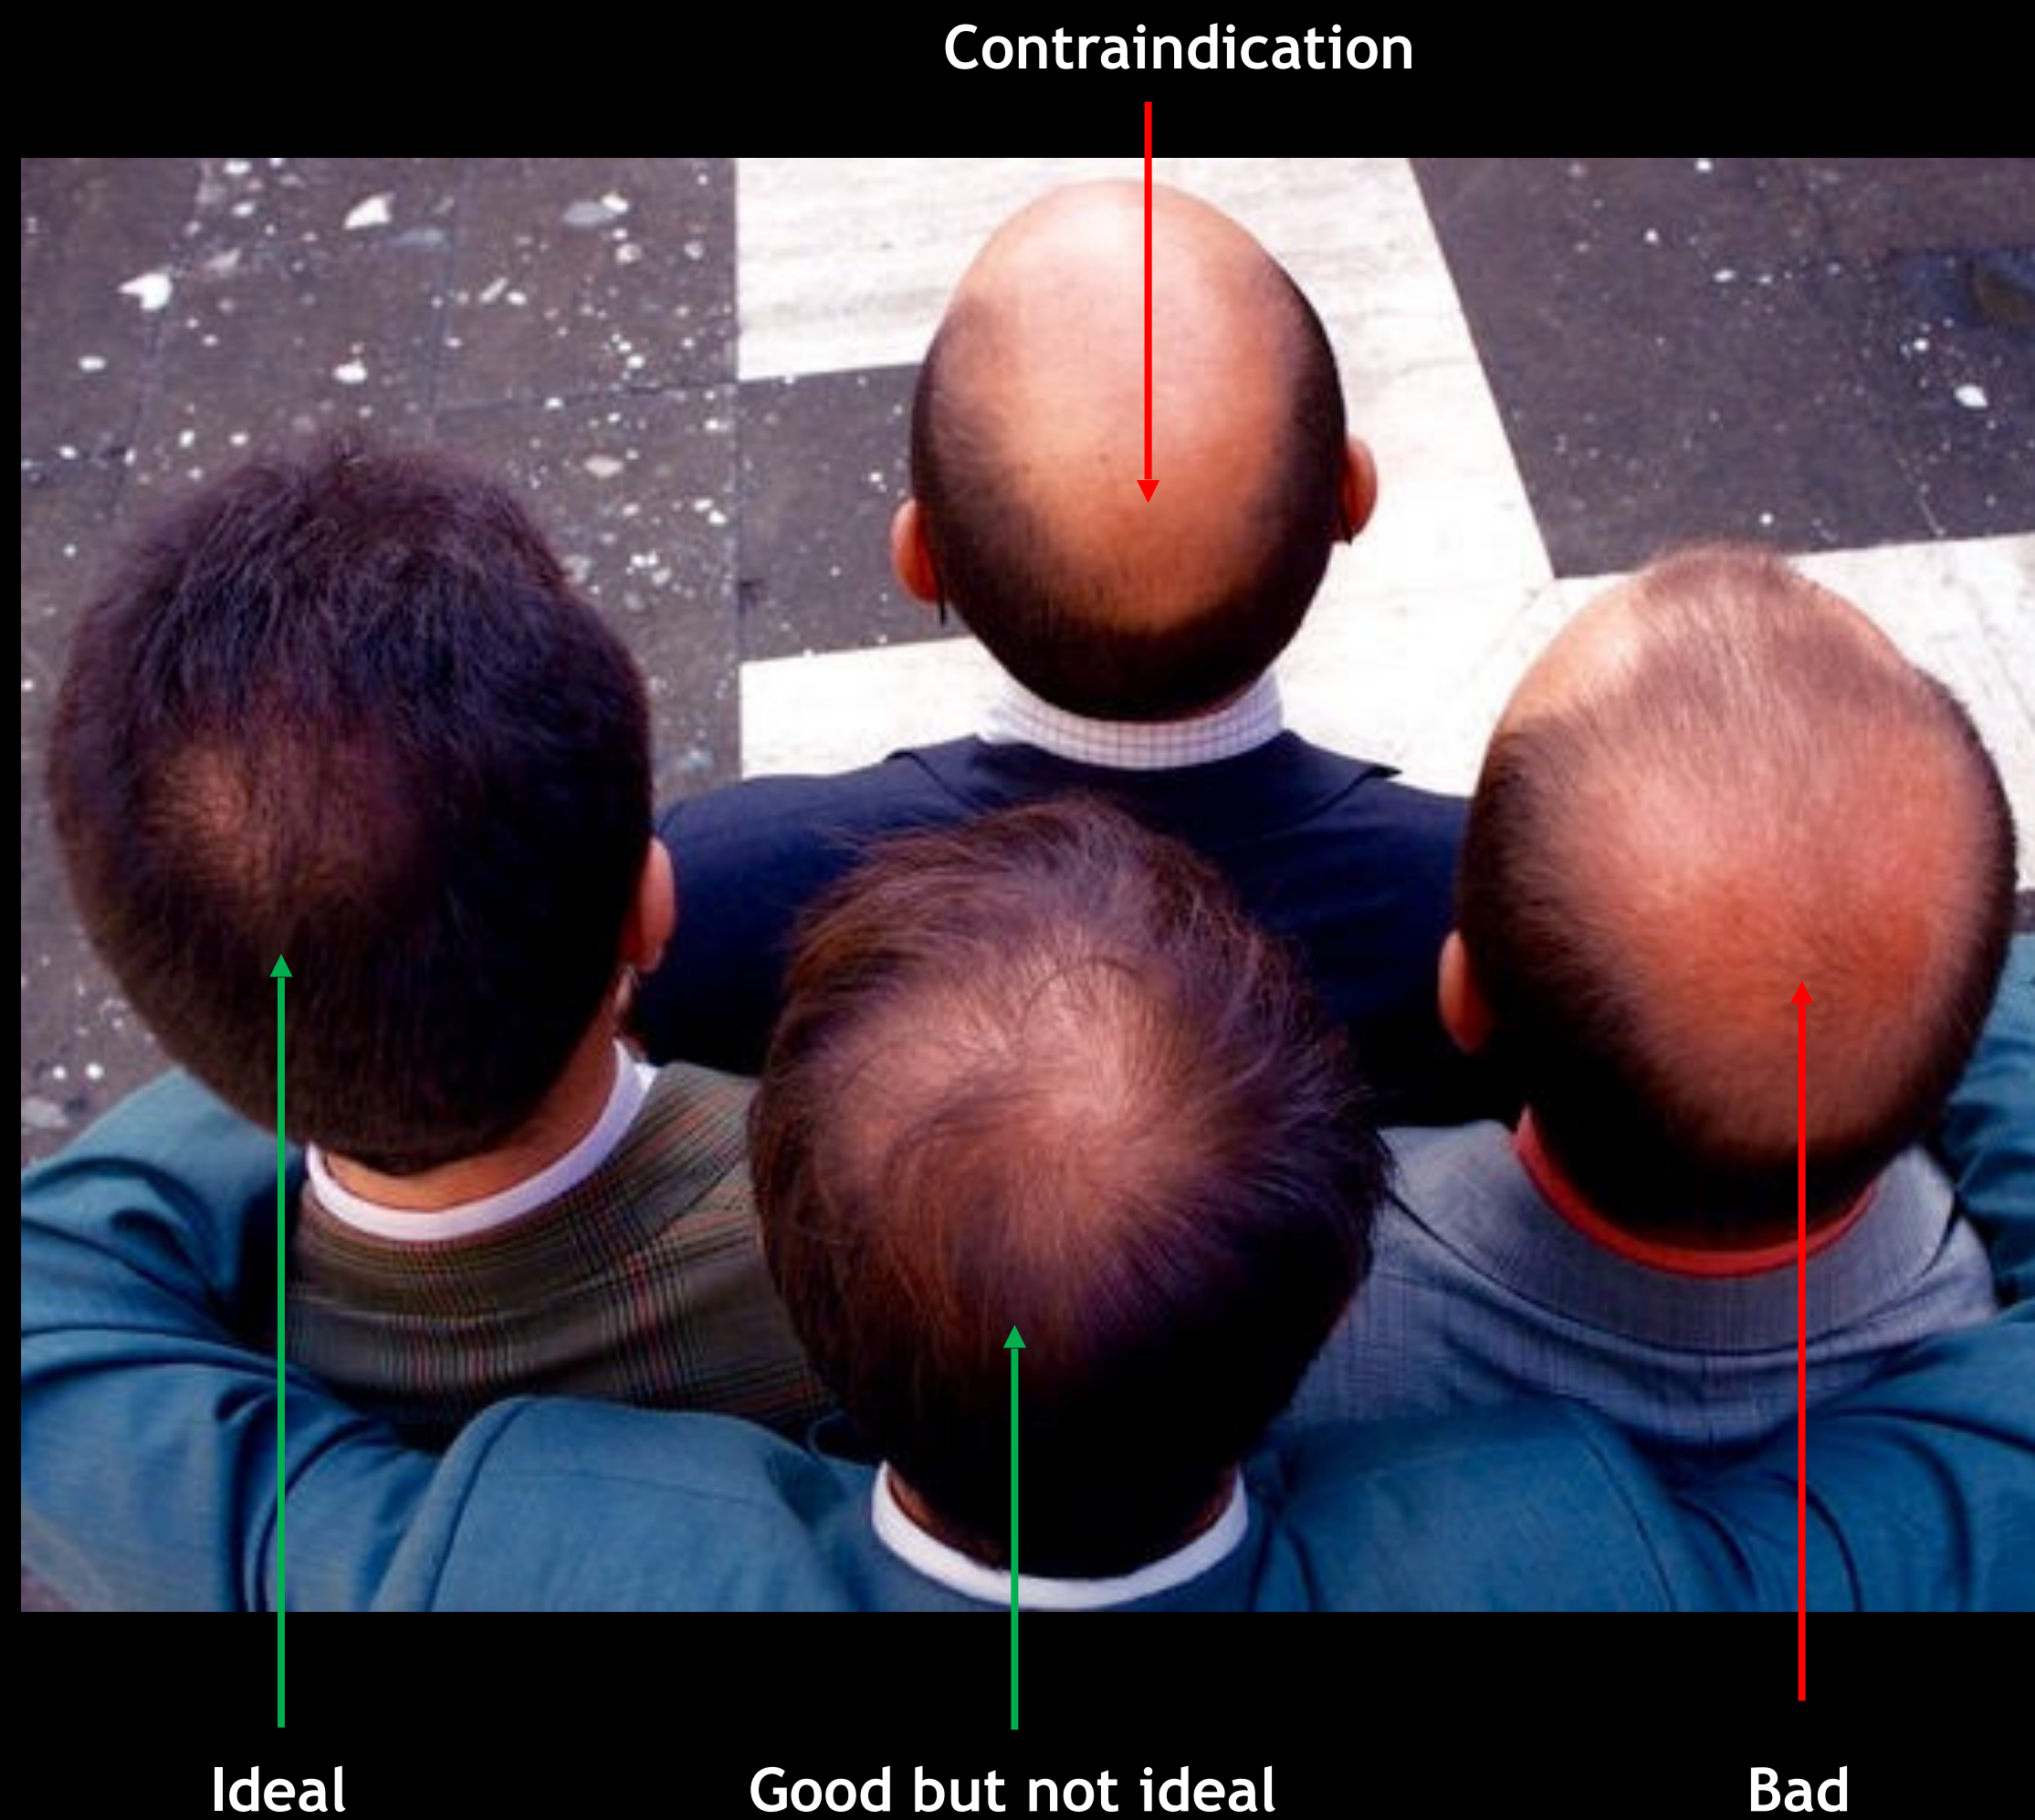

# Regenera Activa

THE PROCEDURE USES THE ACTIVE AND REGENERATIVE CELLS EXISTING IN THE BASE OF THE HAIR FOLLICLES, CLOSE TO THE BLOOD CAPILLARIES, AND USE THEM AS A MICRO-GRAFT TO STIMULATE AND HELP THE OTHER HAIR FOLLICLES TO GROW HEALTHY AND THICK HAIR.

# Regenera Activa

- THIS TREATMENT IS DIRECTED TO TREAT THE MOST COMMON CAUSE OF HAIR LOSS BOTH IN MEN AND WOMEN- **ANDROGENIC ALOPECIA**.
- IN THE CONSULTATION, THE HAIR WILL BE ACCESSED USING A MICROSCOPE TO SELECT THE SUITABLE CANDIDATES AND THE BEST AREAS OF THE SCALP TO BE TREATED.
- IT IS NOT A HAIR TRANSPLANT AND CAN NOT CREATE NEW HAIR FOLLICLES

# Regenera Activa

## Microscope analysis

**Ideal**

**Good**

**Bad**

# Regenera Activa

- THE MICRO-GRAFT IS OBTAINED FROM THE BACK OF THE SCALP, IN A RICH AND DENSE HAIR AREA, UNDER LOCAL ANAESTHESIA.
- THE GRAFT WILL BE TREATED USING THE REGENERAKIT IN ORDER TO SEPARATE THE CELLS THAT WILL BE TRANSFERRED.
- THE SELECTED CELLS WILL BE IMPLANTED USING A MESOTHERAPY TECHNIQUE.

**Donor follicles**

**Cell Separation**

# Regenera Activa

**Micro-graft using mesotherapy technique**

# Regenera Activa

- THE PROCEDURE IS DONE IN THE CLINIC AS AN OUTPATIENT AND TAKES LESS THAN **30 MINUTES**.
- **ONE TREATMENT PER AREA PER YEAR** WILL SUFFICE FOR HAIR RESTORATION FOR THE MAJORITY OF THE PATIENT, BUT THE RESULTS VARY ACCORDINGLY TO THE SEVERITY OF THE ALOPECIA.
